DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, **the communication system comprising transmitter and receiver of claim 1** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3,4,7,8,9, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. In claims 3,4,7,8 "the data channel" lack clear antecedent basis.

Claim 9 is unclear as written. The particular limitation "any active system component provides the lowest (BER)" vague and indefinite. What are the active system components?

Allowable Subject Matter

6. Claims 1-2,5-6 are allowed.
7. Claims 3-4,7-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
8. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to anticipate or render obvious the claimed method

for selecting an optimum set of pilot coefficients by estimating channel condition through a channel estimation scheme, comprising the steps of:

detecting channel power gains from a plurality of designated pilot symbols;

calculating speed parameter and multi-path parameter of the channel receiving the pilot symbols;

defining a channel model based upon the speed parameter and multi-path parameter value;

choosing a predefined set of pilot coefficients that match the channel model; and

utilizing the set of pilot coefficients for optimizing pilot symbol interpolation in the manner and complexity explicitly claimed in claims 1,2, and 6.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hasiguchi et al. us 2004/0013172; Kowalski et al 6,208,632; Dobrica 5,875,215; and Marchetto et al 5,414,734 are cited to show channel estimation with pilot symbols.
